

# ENERGY MARKETERS OF AMERICA SBC PAC

The Energy Marketers of America invites you to do your part

Some senators and representatives have stepped forward to defend and promote the interests of independent petroleum marketers. Often they do so because they know marketers back home and they have an appreciation for the business.

**When legislators go to bat for marketers, we must be prepared to go to bat for them.**

It is critically important that we help these senators and representatives secure re-election. EMA's Small Business Committee (SBC) PAC Fund was created for this purpose. When legisla-

tors go to bat for marketers, we must be prepared to go to bat for them. EMA's SBC PAC believes it is the duty of every petroleum marketer to contribute something to the PAC. Please donate and demonstrate that you "get it." Government unchecked is dangerous for every business.

## Your contribution will...

- Help elect individuals who are supportive of small business and independent petroleum marketers;
- Support EMA's legislative and regulatory agenda;
- Remind legislators that petroleum marketers are a political force;
- Recognize the unique aspects of the jobber/distributor class of trade and of heating oil dealers;
- Enable EMA to say "yes" when supportive candidates ask for our help;
- Assist EMA to stand up to organizations that represent interests contrary to those of independent petroleum marketers and that are actively building campaign war chests to defeat pro-small business candidates.
